What works? *LifeSkills Training*

- Designed to address key risk and protective factors associated with the initiation and escalation of tobacco, alcohol, illicit drug use.
- Evidence-based program with more than 35 federally-funded, peer-reviewed and published studies.
- Developed by Gilbert J. Botvin, Ph.D.
- Effective in rural, urban, and suburban populations

BOTVIN LIFESKILLS TRAINING

© NATIONAL HEALTH PROMOTION ASSOCIATES 2017

Global Reach

- 3 million students
- 10,000 schools/sites
- 50,000 teachers
- 39 countries

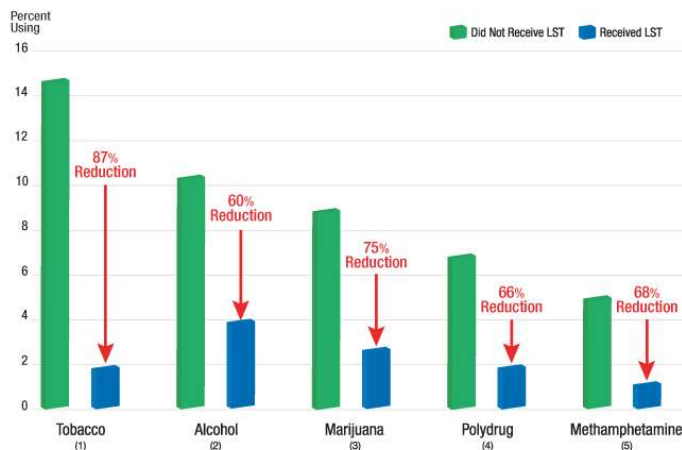

Extensively evaluated in more than 35 scientific studies involving more than 330 schools/sites and 26,000 students in suburban, urban, and rural settings.

Summary of Middle School Evaluation Results

- Reduces substance abuse by up to 87%
- Effective in reducing use/abuse of tobacco, alcohol, marijuana, inhalants, opioids/prescription drugs, narcotics & hallucinogens
- Effects last for at least 12 years
- Effective in reducing aggressive / violent behavior
- Researched and proven effective with African-American, Hispanic, White, Urban, Suburban and Rural Youth

© NATIONAL HEALTH PROMOTION ASSOCIATES 2019

Cost-Benefit Studies

- ROI: \$45 for every \$1 invested in LST
- avoided long-term costs of health care utilization and crime due to substance use disorder, as well as wage loss from disrupted employment

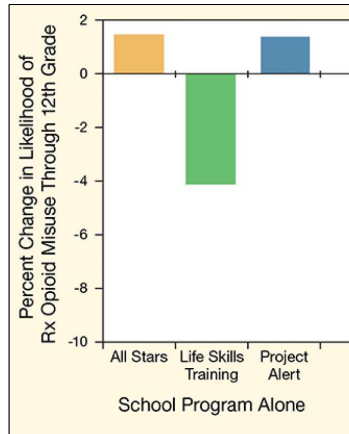

Of the universal prevention programs analyzed, *LifeSkills Training* had the highest cost-benefit ratio as well as evidence rating

NIDA: LST Shields Teens from Prescription Opioid Abuse

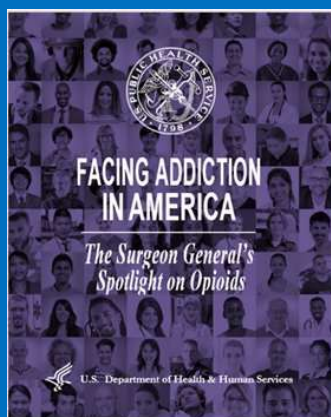

- LST recipients were less likely to misuse opioids throughout middle and high school.
- Estimated savings of \$6,887 for each child prevented from misusing opioids.
- Researchers concluded that the likelihood of initiating opioid misuse by 12th grade was reduced by 4.4%.

Case Study: Community Change through the Power of Collaboration

Cambria and Somerset counties in western **Pennsylvania** joined forces in 2011 to implement *LifeSkills Training* in a concerted effort to combat drug use.

Over the past 6 years, classrooms across the region received the ***LifeSkills Training* program** thanks to **strategic focus and funding** by the United Way of the Laurel Highlands, 1889 Foundation, Twin Lakes Center, Cambria County Drug Coalition, Somerset Drug Free Communities, Pennsylvania Commission on Crime and Delinquency, and the University of Colorado

Case Study: Community Change through the Power of Collaboration

The last Botvin lesson that I remember was about how to control our ever-changing emotions. Especially about anxiety, how to get help with that, how to control breathing and a bunch of different techniques that we learned through the Botvin program. Also, about depression and how to talk to people instead of turning to substances. And anger -- I know that's a big problem in schools and the Botvin program taught us different methods to cope with it." --
8th Grader, Meyersdale Area School District
Somerset County, PA

RESULTS

The completion of the 2015-2016 school year marked the first cohort of 8th grade students who had successfully completed 3 consecutive years of the Botvin LifeSkills Training program. The results were impressive.

The data extracted from the Pennsylvania Youth Survey showed **significant decreases** across all areas surveyed, including **alcohol, tobacco, and marijuana**. All 18 risk factors measured showed a significant reduction (48% on average) in risky behaviors, including binge drinking, marijuana usage, and prescription misuse.

SIGNIFICANT DECREASES HAVE BEEN MEASURED IN THE TOP 3 CRITICAL AREAS WHERE ABUSE IS MOST PREVALENT—ALCOHOL, TOBACCO, AND MARIJUANA (BOTH 30-DAY & LIFETIME USAGE).

LST Student Guide

Deciding Things on Your Own

As you get older, you make more and more decisions on your own. Some of these may be very difficult. To make the best possible decisions, you need to be aware of the people or things around you that can influence your decisions (such as your parents, friends, TV, movies, and advertisements). You also need to learn an organized method for making decisions. Being aware of the factors that might influence your decisions and knowing how to make them can help you to make the best possible decisions for you.

A Simple Method for Making Better Decisions

Most people make all their decisions in the same way, without realizing the difference between simple choices, everyday decisions, and major decisions. Simple choices (whether to eat vanilla or chocolate ice cream) can be decided based on what you like. Other decisions should be made after carefully thinking about the possible consequences, or outcomes, of different decisions. To do this as well as possible and make the best decisions, learn to use the 3-step method described here.

The 3 Cs of Effective Decision-Making

Step 1: Clarify what decision you need to make.

Step 2: Consider the possible alternatives (think about the different things you might decide to do) and the consequences of choosing each alternative; collect any additional information needed. (If you are trying to solve a problem, think up as many solutions as possible.)

Step 3: Choose the best alternative and take the necessary action. Afterwards, think about whether you were satisfied with your decision.

© NATIONAL HEALTH PROMOTION ASSOCIATES 2019

LST Student Guide

➡ Make a list of the most important decisions you have to make regularly at home, school, or with friends.
Check off whether you make those decisions **On Your Own** or whether you are influenced by others. Check all that apply to each decision.

Decisions	On My Own	Parents	Friends	Teachers	Media
At Home					
1. _____	☐	☐	☐	☐	☐
2. _____	☐	☐	☐	☐	☐
3. _____	☐	☐	☐	☐	☐
4. _____	☐	☐	☐	☐	☐
5. _____	☐	☐	☐	☐	☐
At School					
1. _____	☐	☐	☐	☐	☐
2. _____	☐	☐	☐	☐	☐
3. _____	☐	☐	☐	☐	☐
4. _____	☐	☐	☐	☐	☐
5. _____	☐	☐	☐	☐	☐
With Friends					
1. _____	☐	☐	☐	☐	☐
2. _____	☐	☐	☐	☐	☐
3. _____	☐	☐	☐	☐	☐
4. _____	☐	☐	☐	☐	☐
5. _____	☐	☐	☐	☐	☐

➡ Read each of the situations and (1) **clarify** the problem, (2) list and then **consider** the possible solutions (choices) and their likely consequences, and (3) **choose** the best solution.

Putting the 3 Cs into Practice	
Situation 1 Your teacher gave your class a homework assignment that is due the next day and is a large part of your grade for the course. That night there is an important basketball game that all of your friends will be attending. If you go to the basketball game, you won't have time to do your homework, but you know someone who might let you copy her homework.	
Problem: _____	
Possible Solutions	Possible Consequences
1. _____	1. _____
2. _____	2. _____
3. _____	3. _____
My Decision: _____	
Situation 2 Your friends want to get together at your house after school when no one is home. They want to drink alcohol. You want to be with your friends, but you know your parents will be angry and you'll get in a lot of trouble if your friends drink at your house.	
Problem: _____	
Possible Solutions	Possible Consequences
1. _____	1. _____
2. _____	2. _____
3. _____	3. _____
My Decision: _____	

© NATIONAL HEALTH PROMOTION ASSOCIATES 2019

LST Student Guide

➡ Choose two decisions that you have to make now or sometime in the near future. Briefly describe the situation and then (1) **clarify** (identify) the decision to be made or problem to be solved, (2) list and then **consider** the possible solutions (choices) and their likely consequences, and (3) **choose** the best alternative.

Implementation

FIDELITY & FLEXIBILITY

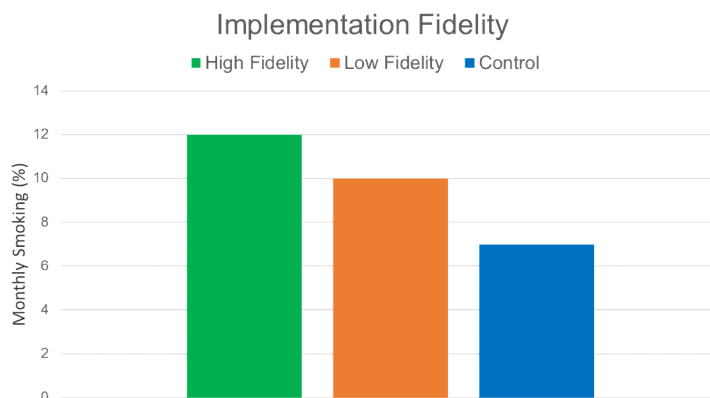

© NATIONAL HEALTH PROMOTION ASSOCIATES 2017

How is the program implemented?

- Best results are achieved with provider fidelity
 - Teach the full scope and sequence
 - Teach the units in order
 - Teach at least 1 x week
- Optimum fidelity is achieved through planning with key stakeholders
- The program can be implemented more than once a week to accommodate different schedules

© NATIONAL HEALTH PROMOTION ASSOCIATES 2019

The Importance of Fidelity

© NATIONAL HEALTH PROMOTION ASSOCIATES 2019

Implementation by Level

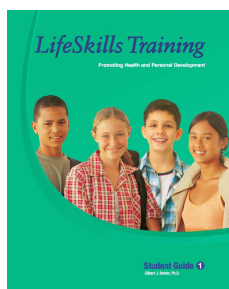

- **LST Elementary**
 - Each level is stand alone
- **LST Middle School**
 - Level 1 (Core) plus booster levels (2 & 3)
- **LST High School**
 - Stand alone level
- **LST Transitions**
 - Stand alone level

Professional Development

Teaching Marijuana Prevention, 2-part online workshop

The status of marijuana has undergone rapid legal and cultural shifts in recent years. These changes present specific challenges to school and community health educators.

In this workshop, participants explore the social and legal trends in acceptance, the pharmacology of marijuana, and effective strategies for responding to the misconceptions adolescents hold about marijuana.

Teachers

LST Lesson
Connections

Resources
for further
information

Botvin Health Connections™

e-Cigarettes and Vaping

Background for the Teacher

Why do kids choose to use e-cigarettes or vape?

There are numerous reasons why youth choose to engage in using e-cigarettes. Botvin Health Connections™ (BHC) includes a lesson plan for middle school students and the Botvin Health Connections™ e-Cigarettes and Vaping program.

Introduction

Botvin Health Connections™ is a research-informed health education program designed to help middle school students learn how to resist peer pressure and avoid risky behaviors. The program includes a lesson plan for middle school students and the Botvin Health Connections™ e-Cigarettes and Vaping program.

What chemicals are in e-cigarettes (e-liquids)?

The ingredients used in e-cigarettes are not identical to those found in tobacco cigarettes. E-cigarettes contain a liquid called e-liquid or e-juice. The liquid is heated and inhaled. The liquid contains nicotine, which is addictive. It also contains flavorings and other chemicals. Some e-cigarettes also contain heavy metals like lead and cadmium.

Scope of the Problem

E-cigarette use among youth has increased significantly in recent years. In 2018, 10.5% of middle school students reported using e-cigarettes. This is a significant increase from 2017, when 7.5% of middle school students reported using e-cigarettes.

2018 E-cigarette Use (9th, 10th, and 11th grade)

Grade	9th	10th	11th
Used	10.5%	10.5%	10.5%
Did not use	89.5%	89.5%	89.5%

Do you disapprove of people who...

60.2% Disapprove

Toothpaste
Aerosol air fresheners
House paint

LST Lesson Connections

Botvin (Global Training LST) Middle School Level 1

Lesson

Connections

Learning Objectives

Students will be able to:

- Identify the health risks of e-cigarettes and vaping.
- Identify the chemicals found in e-cigarettes and vaping.
- Identify the reasons why youth use e-cigarettes and vaping.
- Identify the ways to resist peer pressure and avoid risky behaviors.

Activities

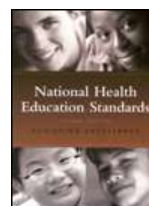

Students will participate in a variety of activities designed to help them learn about the health risks of e-cigarettes and vaping. These activities include role-playing, group discussions, and individual reflection.

Assessment

Students will be assessed on their understanding of the health risks of e-cigarettes and vaping. This assessment will be done through a variety of methods, including a written test, a group presentation, and a self-reflection essay.

Aligned to National Health Education Standards (Middle School)

- Assists in identifying ways to incorporate LST into existing curriculum requirements
- Increases fidelity-based implementation of the program, which increases effectiveness in outcomes to reduce and prevent health risk behavior
- Encourages faculty and administrative adoption and support for inclusion of prevention education in the overall curriculum ...rather than viewing it as an add-on or supplemental curriculum that has to be fit into existing requirements

Aligned to SEL Competencies

- Self-awareness
- Self-management
- Social awareness
- Relationship skills
- Responsible decision-making
